Subject: Concurrent Projects, Kennecott Utah Copper Corporation, Bingham Pit,
M/035/002, Task #1699, 1700, Salt Lake County, Utah

Dear McGowan-Jackson:

During the month of February, the Division received notices of three projects that Kennecott is undertaking at the mine. The North Ore Shoot Shaft, the Highland Boy Drainage Gallery and Re-Establishment of the Mine Access Road and Water Pipelines within the Lower Bingham Canyon Waste Rock Dump.

General discussions of these items are already provided in the Bingham Canyon Mine Reclamation and Water Management Plan. The information submitted provides greater detail than in the plan. As discussed with Vicky Peacey, adding this project information as an appendix to the Reclamation and Water Management Plan would provide an organized place for this information. At the end of the year, a map in the Water Management Plan would be updated with the information.

Please provide 2 copies of the North Ore Shoot Shaft, the Highland Boy Drainage Gallery, and Re-Establishment of the Mine Access Road and Water Pipelines projects for this appendix. One copy will be returned for your plan.

The Division appreciates Kennecott's efforts to keep us informed of ongoing activities occurring at the mine site. If you have any questions concerning this correspondence, please contact me at (801) 538-5258.

Sincerely,

Susan M. White
Mining Program Coordinator
Minerals Regulatory Program
